

ATLAS

The American Legion Teams Up With VA To Offer Video Telehealth Appointment Locations

The Department of Veterans Affairs (VA) and The American Legion are proud to connect Veterans to VA care closer to home. Through ATLAS (Accessing Telehealth through Local Area Stations), Veterans can meet with a VA provider by video in a private room at select American Legion posts. This new option makes VA care easier to access and reduces burdens like long travel times to appointments.

VA Care at a Convenient Location

Select American Legion posts provide Veterans with a **private appointment room** to virtually meet with a VA provider.

Using VA Video Connect, Veterans can connect with a VA provider through **secure, real-time video**.
